

How Nigerian students are using uLesson to prepare for the new school year

On September 12th, Nigerian schools opened for the new academic year. But for many Nigerian students they've already been preparing for the new term since August with summer lessons. An increasing number of Nigerian students are using uLesson, Nigeria's leading edtech company, to excel inside and outside of the classroom.

About the survey

uLesson conducted an online survey of 539 of its learners to assess how they're studying with the app to prepare for the new school year. Respondents were equally distributed between JSS and SSS.

Insights from the survey intend to shed light on how Nigerian learners are using uLesson in conjunction with their school work.

Ease of Use

uLesson makes learning easy and fun for its learners.

79%

of learners say it's very easy to use

uLesson is an invaluable study buddy helping learners get ready for the new academic school year.

9 out of 10

use the uLesson app to prepare for the next school year

7 out of 10

used uLesson to study during summer lessons

Time Spent

uLesson caters to learners at all levels. Some learners only need a brush-up of topics while others need an intensive review.

72%

spend up to 4 hours learning on uLesson per week

28%

spend more than 4 hours learning on uLesson per week

Features

uLesson provides a holistic review to learners who can use a combination of features to review core curriculum, receive additional help with abstract topics, and assess comprehension.

What learners say about uLesson

“

Nabila A.

At school, we didn't have a regular chemistry teacher, so the subject wasn't easy. It was quite hard. But when I started using the uLesson app, it became easier.

”

Chemistry used to be Nabila's most difficult subject. Nabila started studying with uLesson to review SS1 and SS2 topics as well as get better grades in Chemistry. After studying with uLesson, she came first in Chemistry last term.

“

Oluwatimisin O.

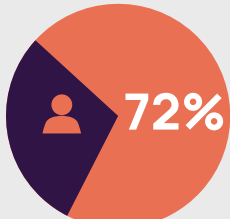

At the moment, I feel 70-75% ready for [the GCE]. If I'm to retake physics and chemistry right now, I'll be in the range of B-B2.

”

Oluwatimisin's used the pre-recorded content library to brush up on his physics and chemistry subjects before resitting the GCE. He liked how teachers in the videos break down each concept in granular detail. After studying with uLesson for one hour each day, he is confident of passing the exam.

Learners love to tell their friends about uLesson

like to keep it a secret - it's their super power!

About uLesson

uLesson is an African edtech company that helps learners master core curriculum and achieve academic mastery. Over 3m learners in Nigeria and 7 other African countries have downloaded the uLesson app to date. Its four features - pre-recorded video library, live lessons, test prep and homework help - work together to provide a comprehensive review of JSS and SSS curriculum.

uLesson employs an individualistic approach to learning, applying simplified teaching methods designed to improve each student's learning ability with quality lesson plans from the best tutors. uLesson takes complex concepts of maths, physics, chemistry and biology and present them to the learner in a manner that makes learning interactive and engaging.
